**MWA Study Visit to MDEC
(Malaysia Digital Economy Corporation)**

14 February 2017 (Tuesday)

10:30 am – 12:00 pm

INTRODUCTION

Malaysia Digital Economy Corporation Sdn. Bhd. (MDEC) is the holistic, government-owned agency launched in 1996 to pioneer the transformation of Malaysia's digital economy. Its roots stemmed from Vision 2020, the plan to develop Malaysia into a fully-developed nation by 2020.

MDEC pursues a digital future that unlocks significant economic, environmental, and social value within the nation. It was entrusted to oversee the development of the MSC Malaysia initiative, the platform to nurture the growth of local tech companies whilst attracting foreign direct investments (FDIs) and domestic direct investments (DDIs) from global multinational companies. The impact of this includes increasing Malaysia's Gross National Index, bridging the income gap and improving standards of living.

MDEC is committed to empowering Malaysians by enhancing their digital skills in order to meet industry-demands. Find out how it inspiring Malaysians to embrace the global, digital paradigm.

From the perspective of MWA, the water and wastewater sectors are lagging behind the other service sectors like the telecommunications, energy and oil & gas sectors in terms of ICT and use of related technologies in their daily operations and business applications.

Hence, a study visit to MDEC is to get a first hand view and information to enable our members to get acquainted with the role of MDEC and how it can introduce the water industry into the world of digital economy in their businesses. In particular we would like to know a bit more on the development in Big Data, IoTs & Cloud, which can be game changers to bring the water sector to be on par with the other sectors.

TENTATIVE PROGRAMME
