OPERATION OF WATER TREATMENT PLANT & WATER SUPPLY DAM IN MALAYSIA

The Operation of Water Treatment Plant & Water Supply Dam in Malaysia is a technical book written by late Ir. Chan Chiang Heng published in 2018. There are 2 sections in this book. First section discusses at length on raw water quality, treatment problems encountered and their specifics to conditions in Malaysia. Second section describes the requirements for efficient dam operations including advanced formulation of references such as the available volume of water in the dam in respect of time and rate of dam release and appropriate layer to abstract water for treatment.
