Celebration of World Water Day 2021 – “Valuing Water”

On 22 March, 2021, World Water Day will be celebrated in an online event, organised by the Malaysian Water Association.

The theme of the MWA World Water Day 2021 Celebration is “**Valuing Water in Malaysia**”.

- *The value of water is about much more than its price – water has enormous and complex value for our households, food, culture, health, education, economics and the integrity of our natural environment.*
- *If we overlook any of these values, we risk mismanaging this finite, irreplaceable resource.*
- *Valuing water is not pricing water. The objective of valuing water is not to increase water prices, but to make more informed decisions to confirm optimal allocation and usage of water.*
- *Without a comprehensive understanding of water’s true, multidimensional value, we will be unable to safeguard this critical resource for the benefit of everyone.*
